DATA NOTES

Ranks are for the largest 100 metropolitan areas by population. Export growth rates are inflation adjusted by industry. Top three losses and gains in exports value are in 2012 dollars. Exports include goods and services and are estimated by production location; therefore, they do not match the U.S. Census Bureau's estimates of metropolitan exports, which reflect origin of movement. Exports exclude waste, scrap, used merchandise, goods returned to Canada, special classification provisions, re-exports, military transfers, government services, and expenditures of foreign embassies and international organizations in the United States.
